Sales Presentation Case – Dell EMC

Introduction:

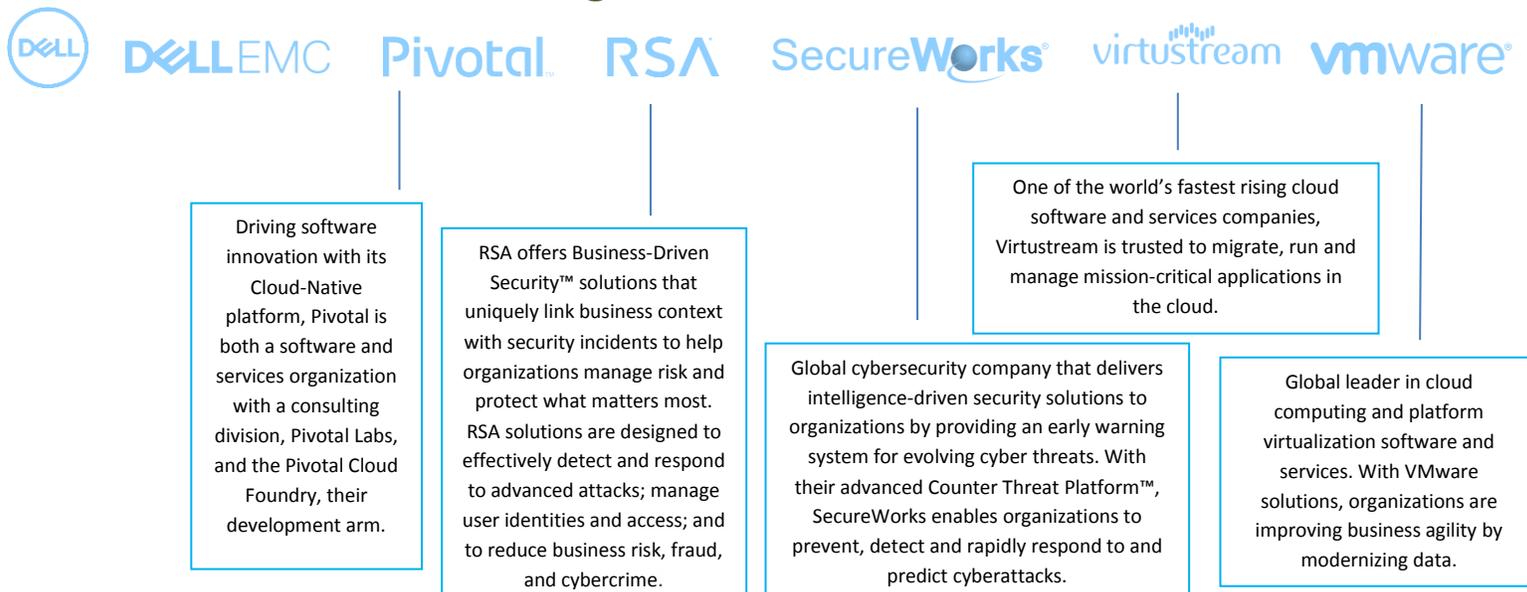

As a member of the Dell Technologies unique family of businesses, Dell EMC serves a key role in providing the essential infrastructure for organizations to build their digital future, transform IT and protect their most important asset: information. Dell EMC enables our enterprise customers' IT and digital business transformation through trusted hybrid cloud and big-data solutions that are built upon a modern data center infrastructure that incorporates industry-leading converged infrastructure, servers, storage and cybersecurity technologies.

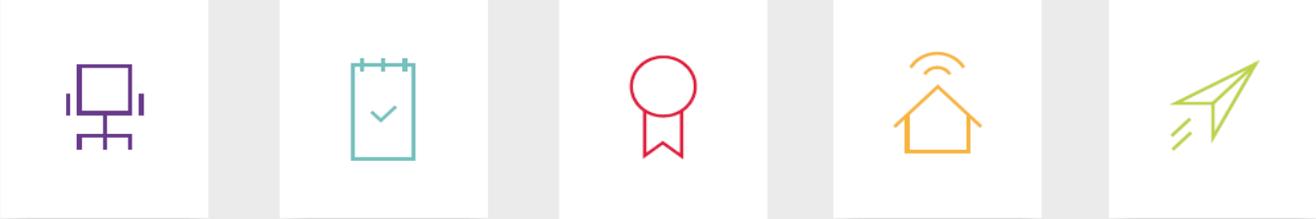

Dell EMC brings together Dell's and EMC's respective capabilities and complementary portfolios, as well as sales teams and R&D. We seek to become the technology industry's most trusted advisor, providing capabilities spanning strategy development, consultative services, solution deployment and support to help our customers and partners drive the digital transformation of their businesses.

We work with organizations around the world, in every industry, in the public and private sectors, and of every size- from start-ups to the Fortune Global 500. Our customers include: global money center banks and other leading financial services firms, manufacturers, healthcare and life sciences organizations, internet service and telecommunications providers, airlines and transportation companies, educational institutions, and public sector agencies.

Seven Brands of Dell Technologies

Workforce Transformation

The way we work is changing at a dramatic pace and will continue to change. Work is no longer a location- it's an activity. Our work is becoming more immersive, more collaborative, more mobile and definitely more competitive. This new era has created a new set of challenges for organizations. How do you balance the reality of cost with keeping pace with technological changes, with end user productivity and data security?

Experts agree happy employees perform at a higher level, generating more satisfied customers and superior corporate performance. In fact, companies with happier employees have 81% higher customer satisfaction and half the employee turnover compared with other firms. Employees expect a high quality workplace experience- including advanced and easy-to-use technology. They also expect to be able to work, and work productively, from anywhere, at any time. With user choice comes IT complexity, and the company needs to determine how to manage and support this diverse and decentralized system.

So what does the data say?

Work is no longer a location- it's an activity.

 **60%**
work after
business hours.

 **66%**
do some business
from home.

Workforce Transformation increases security challenges.

 **95%**
of security breaches originate at the
endpoint.

End users are becoming increasingly demanding.

 **44%**
think their workspace isn't
smart enough.

 **42%**
would quit a job over
poor technology.

 **82%**
say tech influences
which job they take.

 **58%**
say IOT and AR/VR
is a job perk.

Account Overview

MediaSoft is a successful software company. With over 1,000 employees across North America, they create practice and case-management software for law firms and government agencies. Their business started 10 years ago and is now looking to expand its portfolio and enter new markets.

In order to continue growing, MediaSoft is planning to double its number of employees (primarily in the areas of marketing, field sales and software developers) within the next year. Due to the nature of its business and industry regulations, ensuring customer data is kept confidential is critical and any size of breach could immediately put them out of business.

MediaSoft's Goals for a Successful Expansion

Goal	Challenges
Attract new talent and align technology requirements to each role resulting in employee satisfaction improvements of 50%	<ul style="list-style-type: none">• One of the chief complaints from offer rejection surveys is that prospects aren't impressed with the lack of remote work and corporate device-only strategy.• Current IT infrastructure isn't equipped to support BYOD ("bring your own device") and struggles to support multiple devices.• Their current workforce has expressed dissatisfaction that they don't offer a choice of devices, in particular their software engineers who feel they need more powerful systems as well as employees in the field who need to be able to conduct work from anywhere while on the go.
Reduce the amount of time it takes to deploy new technology and simplify the management of their infrastructure resulting in related productivity gains of +20%	<ul style="list-style-type: none">• No programmatic refresh plan; many employees are still working on old sluggish desktops and in the field with thick, heavy notebooks.• Software developers are experiencing significant downtime because their systems can't keep up and often crash in the middle of work streams.• Looking for guidance on client lifecycle maintenance and refresh, as well as guidance on how to determine what the right devices are for their varying types of employees.• Due to limited office space, any workforce expansion will require a remote and flexible work environment.• MediaSoft is unsure of how to enable and manage remote work no matter where the employee is located.
Protect against security threats and data breaches	<ul style="list-style-type: none">• A data breach would put them out of business. This is one of the primary concerns that has kept them away from BYOD and remote work.• As MediaSoft increases the number of employees they have in the field and begin to explore how to enable a flexible work environment, they are challenged with how to keep their data secure outside the physical walls of their office.

Summary

MediaSoft has been evaluating the marketplace seeking advice and guidance on how to move into a “workforce transformation” that will allow them to attract the best new talent and re-energize their existing workforce. Your mission is to present a Dell solution that will encompass MediaSoft’s goals of talent acquisition, productivity improvement, and data protection to set the stage for their next phase of growth and development.

Best of luck and good selling!
