

International Marketing Case

The *International Marketing Case* challenges students to think creatively and strategically in a time constrained situation. As a judge in this event, your role is to assume the role of the company management described in the case scenario and evaluate how effectively each team presents their case analysis and recommendations to address the issues raised in the case study.

The Case Scenario

The students competing in this event will be expecting the case scenario to be of an international expansion nature, however, the students will not be given advance information about the company or industry the case scenario is based on. The case scenario will focus on key considerations facing a company looking to expand outside of its current country of operation, usually Canada. The company could also be considering making changes to its current international strategy. The intent of the scenario is to address the realistic challenges involved in globalization, and as such, may present a problem relating to identifying a suitable target market, product or operational changes required, financial considerations, entry strategies, or how to compete effectively in the new market.

General Judging Considerations

The students' role in this event is to present a recommendation on an International Marketing initiative. They should be able to identify the problem or opportunity the corporation is facing, and clearly describe the environment that the company is operating within (SWOT analysis). They will offer 3 solid alternatives, and make a recommendation, including a clear implementation plan. Students should be able to discuss their plan using industry standard terminology.

It is assumed that each judge is from the client company.
